

HB530: Health Occupations - Pharmacists - Administration of Vaccinations

Ruth Goetz

Oppose

Dear HGO Committee Members:

Please vote no on HB 530.

Pharmacists should not be permitted to give children vaccines without physicians' permission. Pharmacists are now using cash incentives to entice adults to receive vaccinations. If this bill passes, what is to stop a young child or teenager from going store to store having a medical procedure to make a quick buck?

Parents are often not fully informed of the risks involved, now you want children to make their own medical decisions?

Sincerely,

Ruth Goetz
